## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-4, 6-13, 15, 21-27, 29-31, and 49-57 are rejected under 35 USC §103(a). This rejection is set forth in the prior Office action mailed on March 22, 2007.

### ***Response to Arguments***

3. Applicant's arguments filed September 24, 2007 have been fully considered but they are not persuasive.

Applicants argue that the secondary reference teaches away from the polymers of the present invention, since their polymers contain from 0.2 to 5% of another substance, monomer, which is not part of the claimed polymers, presumably because of the use of the transitional phrase "essentially of." The arguments are not considered convincing because the transitional phrase "consisting essentially of" avoids materials/components or steps that materially change the composition or the methods. It has been held that "[I]f an application contends that a additional steps or materials in the prior art are excluded by the recitation of "consisting essentially of," applicant has the burden of showing that the introduction of additional steps or components would materially change the

characteristics of applicant's invention. *In re De Lajarte*, 337 F.2d 870, 143 USPQ 256 (CCPA 1964). It is applicant's burden to establish that a step practiced in a prior art method is excluded from his claims by consisting essentially of language. *Ex parte Hoffman*, 12 USPQ2d 1061, 1063-64 (Bd. Pat. App. & Inter. 1989).

It is the examiner contention that so low inclusion of the monomers of the prior art would not materially affect the claimed composition.

The rejection is maintained until applicants show that the material shown by the secondary reference is materially different than the claimed composition/polymer.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
